GST Module -Integrated with Inventory

The biggest challenge in GST now is that if your vendor /supplier does not give you the bills on time, you are unable to claim your GST.

When so many bills raised and so many parties are there, how to track who has given the bills and who have not?

“Infraconsoft - GST Module” has the facility to store all the invoices raised by you in the Inventory automatically and also provides you the list of parties who have provided and not yet provided the bills.

Project Management (Pre and post order confirmation)

(With Bill of quantities (BOQ) included & integrated)

Have you ever had trouble arranging orders in the priority of different orders. May be you had those pressure-free days when you were new to the industry when you could arrange them at the count of your ten fingers. Not anymore! This module helps you prioritize your orders/contracts in the best right order. Does that not relieve your mind off a great deal of pressure?

Project Management Master

- ✔ Contract Master
- ✔ Project Listing
- ✔ Work Type Master
- ✔ Work Location Master

Project Management Transactions

- ✔ Tender Details
- ✔ Estimation Listing
- ✔ Billing
- ✔ Project Costing
- ✔ Job/Contract

Project Management Reports

- ✔ Estimation Report
- ✔ Project Expenses Report

Production (With Bill of Materials (BOM) included & Integrated)

This is a newly developed class of module designed for tracking batch production of products used in the industry. It is very helpful in simplifying the minute road raw material process enabling reduction in wastage of production each time.

Production Master

Production Item Details

Production Transaction

Production Details

Production Reports

Inward/ Outward Report

Payment & Vouchers (Project wise payment tracking)

"Infraconsoft" also keeps track of all the construction project related payments. Now do you have a reason to unintentionally lose a penny in project finance transactions?

Payment And Voucher Master

- ✔ Labour Charges Entry
- ✔ Voucher Entry

Payment And Voucher Transaction

- ✔ Labour Charge
- ✔ Billing Entry

Payment And Voucher Report

- ✔ Labour Charge/Voucher Reports

Tally Integration from Inventory to *Tally software

- ✔ Nissi Infotech has developed separate integration software for Tally accounting software.
- ✔ Using this, we are connecting our own inventory software and the Tally software.
- ✔ Once the integration software is activated, automatically the information from the inventory software is transferred into tally under the correct heading and the the accounts staff can take printouts.
- ✔ The tally software working in branches also can be connected to the HO tally software and all the branch information can be integrated.
- ✔ We have already done this for companies.
- ✔ Any kind of report can be carved out of inventory software.
- ✔ It's one-click operation and is very easy to operate.

Why should you buy Infraconsoft?

Difference "Infraconsoft" would make in your industry:

Think for a moment the reality in business world. You are managing multiple projects over a vast area with stores stretched across branches. Your problems are now multifaceted.

- How do you keep track of expenses in each project?
- How do you manage vehicles between projects?
- How do you plan/schedule efficient movement of raw materials between stores?
- How do you track/schedule vehicle overhaul, spares management, and refueling?
- How do you manage/schedule skilled labours between projects?
- How do you manage/schedule payments?
- How do you keep track of the past tenders?
- How do you workout profitable tenders?
- How do you maintain punctuality of your project delivery?
- How do you organize irregular work flow?

Indeed, more complex the operations: More reasons to use "Infraconsoft."

How can you save more than Rs.90,00,000/- (Rupees Ninety Lakhs) by installing infraconsoft year after year?

Let us look at some instances of conservative estimate of savings just from better control of your business by using "Infraconsoft." For example if you have 5 branches located all over the country/or state.

- ✔ Cost saved in one branch per day = Rs.5,000/-
- ✔ Cost saved in 1 branch in 1 month = Rs.5000 X 30 = Rs.1,50,000/-
- ✔ Cost saved in 5 branches per month = Rs.1,50,000 X 5 = Rs.7,50,000/-
- ✔ Cost saved in 5 branches per year = Rs.7,50,000 X 12 = Rs.90,00,000/-
